

January 8, 2019 Course Update

- ❖ 2019 Rainfall = 4.52”
 - Rain on Saturday night into Sunday morning added 0.85” and Monday another 0.45
 - Only two light frosts with no delay thus far this winter
- ❖ Greens; Look and roll very well
 - Next aerification on schedule for April 1-3rd, course will be closed
- ❖ Fairways;
 - Almost completely dormant, growth has slowed significantly since last month
 - Only mowing twice a month verse weekly
 - Aerification scheduled during greens aerification
 - Fungal disease visible on several holes has been treated and stopped
 - Slow to recover because of turf dormancy but not getting any worse
- ❖ Tees:
 - Aerification also scheduled for April 1-3rd during course closure
- ❖ Rough;
 - Currently mowing every two weeks, green and tee surrounds are mowed weekly
 - Inter-seeding all cool season turf areas weather permitting, more specifically day time temperatures are in 70's
- ❖ Closure of green 11;
 - Calleguas water main leak; 48” mainline enclosed by 2 feet of reinforced concrete, discovered on November 24th
 - Repair has been very slow because of excessive ground water
 - Blois, Calleguas contractor, has had to control the ground water so they can expose the pipe from below
 - It has taken 3 weeks to control the ground water but they feel it is now
 - Holidays and rain have also slowed the progress
 - Portion of pipe leaking was discovered today and pipe was ordered for repair expected by end of the week
 - Completion of repair expected next week weather permitting

See you on the course!
